

WPL9060

WPL9100

WPL9160

Technical Information

Power requirement: 110/230V +/-10%, 50–60Hz, 1 phase

Compressed air: 100 l/min @ 6 bar

Pack Sizes:

(mm)	length	width	height
Minimum	80	60	6
Maximum	350	240	150

Weight ranges:

Metric	40g to 4.6kg x 2g Increments
Cental	0.20lb to 10lb x 0.01lb Increments

Enhanced dual metric ranges:

20g to 1.5kg x 1g/1.5kg to 4.6kg x 2g, 40g to 5.5kg x 2g

Accuracy performance to OIML Class III(1),Y(a)

Optional features

Integral automatic twin belt infeed

Price switching and/or label operation controlled by weight zones

Multi-level totalisation of quantity, weight and price

Increased pack height on request

Increased weight ranges on request

Additional labelling heads

Marel machines carry CE certification.

The **9000 series** can operate as stand alone machines or be integrated with a range of manual or automatic production lines.

For further information please logon to: www.marel.com

Touch screens make it easy to change the system when it's still running while checking date, price and traceability before the next product run takes place. This alone can save as much as 5 minutes per product change.

WPL9000 series

Precision Weigh Price Labellers.

- Full access to all systems functions while running
- Set-up wizards available in all menus
- Easy Label editing
- Innova Production Control

The 9000 series Weigh Price Labellers. We think we've thought of everything.

Our 9000 series of Weigh Price Labellers represents a new generation of reliable, accurate, easy to use, time saving weigh price labellers that can operate for long periods without interruption. They employ the very latest technology and class leading design to provide excellent performance at a competitive price. All machines in the range are designed for a wide range of applications and industries and can handle all popular pack sizes at up to 160packs/min.

Key Features and Benefits

- **Full access to all systems' functions while running**
No need to stop machine to check next label set-up or prepare for new product. Saves huge amount of time between label changes.
- **Set-up wizards available in all menus**
Wizards guide the operator through machine and label set-ups reducing need to learn each step when configuring. Easier and less training.
- **Multilingual Operation**
Language module enables operation in a number of key languages. Each user has a password protected favourites folder providing quick and easy access to their own commonly used menus. All changes are logged and traced back to user.
- **Easy Label editing**
What you see on the screen is what you get on the label. Background label image can be stored on the WPL. Drag and drop touch screen facility positions print on label and label position on pack.
- **Touch Screen Control**
Wizards guide the operator through machine and label set-ups reducing need to learn each step when configuring. Easier and less training.
- **Digital weighing accuracy, precision and reliability**
- **System Logging**
Files can be transferred to and from WPL using Windows Explorer. All data is logged in a SQL database and pack/label information is date and time stamped then stored, enabling a high level of integration.
- **Intelligent Production Control**
The 9000 series can be integrated with Innova, Marel's revolutionary software that controls and monitors each step of production in one integrated software system.

WPL9060

Precision weighing and labelling at speeds up to 60 packs/min, for packs of 350mm length. Ideal for large packs.

WPL9100

Precision weighing and labelling at speeds up to 100 packs/min, for packs of 350mm length. Perfect for medium packs.

WPL9160

Precision weighing and labelling at speeds up to 160 packs/min, for packs of 200mm length. Perfect for cheese vac-packs.
